WORK EXPERIENCE

Reactjs Developer

Netfillip Technologies Private Limited

04/2022 - 09/2023

Ahmedabad

It work on web-based application development including Ecommerce development

Achievements/Tasks

- **Component Development:** Build reusable and modular React components that can be easily integrated across different parts of the application. This involves understanding component life cycles, state management, and props.
- **State Management:** Work with state management libraries such as **Zustand** or **React Context API** to manage and share data across different components and ensure a smooth flow of information.
- **Routing:** Implement client-side routing using libraries like **React Router** to create a seamless navigation experience within a single-page application.
- **API Integration:** Communicate with backend APIs by making asynchronous API calls using technologies like Axios, Fetch, or other HTTP client libraries.

Web Designer

Addan Digital Solutions Private Limited

04/2021 - 03/2022

New Delhi

Achievements/Tasks

- Working closely with web developers to implement the design.
- Familiarizing yourself with the features and capabilities of platforms like Wix and Duda.
- Translating design concepts into HTML and CSS code. Ensuring compatibility and responsiveness across different devices and browsers.
- Ensuring that the design is responsive and mobile-friendly using CSS media queries. Testing and optimizing the user experience on various screen sizes.

PERSONAL PROJECTS

Quiz-App (<https://quiz-app-fm.vercel.app/>)
(11/2023 - 11/2023)

- This quiz app built with React, Tailwind CSS, React Router, Ant Design, and leveraging compound components with Context Hooks and Context API offers a modern, engaging, and user-friendly experience for quiz enthusiasts.
- The combination of these technologies ensures a seamless flow, visually appealing design, and efficient state management throughout the quiz-taking process.

Link Sharing App - A Full Stack Project Description
(12/2023 - 12/2023)

- Check it out here: https://lnkd.in/dyX_s-M8
- This app is a feature-rich application that combines the power of ReactJS, Tailwind CSS, Vite, Appwrite, Redux Toolkit, React Router DOM, and Material UI to deliver a modern and efficient link-sharing platform.
- The combination of these technologies ensures a seamless flow, visually appealing design, and efficient state management throughout the link sharing app.

Add Items Cart app (<https://addtocart-abhay.netlify.app/>)
(06/2023 - 06/2023)

- This responsive advice generator app, crafted with React.js, Tailwind CSS, and an external API, offers users a visually pleasing and interactive experience.
- The integration of an external API ensures a variety of advice, keeping the app engaging for users seeking quick and insightful tips.
